Dear Jim:

Subject: Electret Program - H.#582-489, P.M.#'s 335, 424, 435, 444, 445, 446, 447, 448, and 449

On July 31, I discussed with Howard Kothe the prior art which was cited against our German cases and asked him to pass along to you our comments. In essence, they are these.

The references are most pertinent. We can see only very minor differences in the work covered by the references which you sent and our own work. However, we do feel that a response should be filed on both cases.

Sincerely,

Mrs. Thelma C. Heatwole
Patent Liaison Officer
